Sangrar/ anular sangria

The screenshot shows the Visual Studio Code editor with a file named 'archivo.html'. The editor displays an HTML document with a head section containing meta tags for charset, viewport, and title. The body section contains a paragraph of Lorem Ipsum text. The first line of the paragraph, 'Lorem ipsum dolor sit amet', is indented with a single tab character. The terminal at the bottom shows the output of a git push command, indicating a successful push to the main branch.

18 </html>
```

He sangrado con la tecla tab

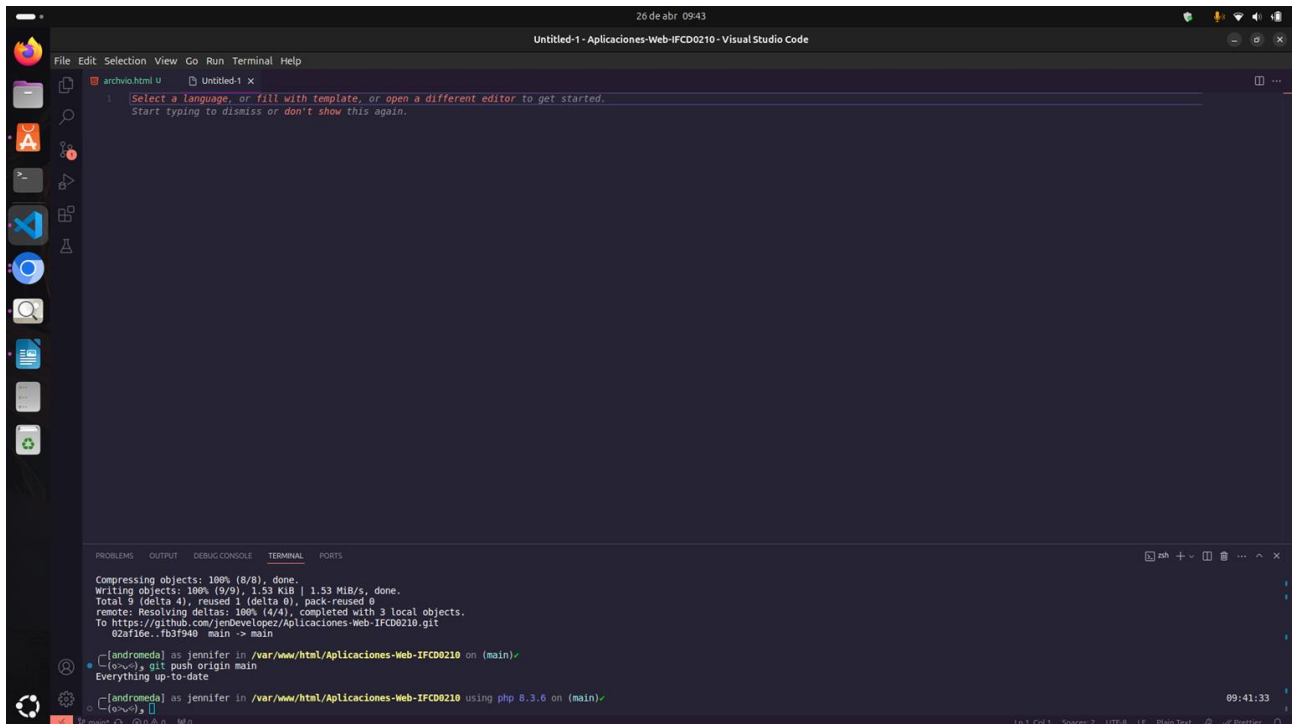

The screenshot shows the same Visual Studio Code editor with the 'archivo.html' file. The HTML document is identical to the previous one, but the indentation of the first line of the paragraph is now achieved using four spaces instead of a tab character. The terminal at the bottom shows the same git push output as the previous screenshot.
